Hafiz b Iman, Raisuddin Khan:

We have reached a decision regarding your submission to IIUM Engineering Journal, "Repurposing a Sampling-Based Planner for a Six-Degree-of-Freedom Manipulator to Avoid Unpredictable Obstacles".

Our decision is: Revisions Required

Please upload the **revised manuscript** in the Revision under Review section and respond to the reviewers' comments based on the **Form within 2 weeks** of this notification.

Response to reviewer form can be download at <https://journals.iium.edu.my/ejournal/index.php/iiumej/libraryFiles/downloadPublic/5>.

**(No email upload will be considered)**

Please note that the  
***Reviewer comments will be found at the end of this notification.***

Thanking you.

-----  
Reviewer A:  
Recommendation: Accept Submission  
-----

Relevance of the title to the general content of the paper

Very Good

Relevance of the title to the domain of research addressed by author(s)

Very Good

Clear identification of the research problems

Very Good

Recomendation from the reviewer

Accepted (The paper is accepted as it is, or is to formatting, spelling corrections)

Comments and suggestions to authors-----

-----  
Reviewer B:

Recommendation: Resubmit for Review

-----

Relevance of the title to the general content of the paper

Very Good

Relevance of the title to the domain of research addressed by author(s)

Excellent

Clear identification of the research problems

Very Good

Recommendation from the reviewer

Accepted with minor correction (The paper contains errors in grammar and presentation, minor improvements in the content of the research may also be required)

Comments and suggestions to authors-----

-----  
Reviewer C:

Recommendation: Accept Submission

-----

Relevance of the title to the general content of the paper

Very Good

Relevance of the title to the domain of research addressed by author(s)

Very Good

Clear identification of the research problems

Very Good

Recommendation from the reviewer

Accepted with minor correction (The paper contains errors in grammar and presentation, minor improvements in the content of the research may also be required)

Comments and suggestions to authors

This is a wonderful piece of work. This can contribute a lot in the field of industrial robotics. However, the following suggestions may improve the quality of the paper.

1. Please put proper labeling on the figures. [e.g. Fig. 1(a) and (b)]
  2. Try to put a clear desktop for fig. 1(a)
  3. If possible, please put a light background for fig. 1(b), fig. 2 etc.
  4. In fig. 2 the dashed circle is not clear to see and will become even more obscure in print version.
  5. A nomenclature for symbols will improve the readability a lot.
  6. Figures of the real robot are very dark it'll be better if the pictures are taken putting lights behind the camera.
